

# Seaward by Whale's High Quality Gimbaled Gas Ranges

#### What is Gimbaled Range?

A gimbal is a pivoted support mount that holds a stove in place – always in a horizontal position. This means the range will always remain steady even in rough marine conditions.

#### **Features and Benefits of Gimbaled Ranges**

- Peace of mind Despite the weather, you can enjoy a level cooking surface in the knowledge that the stoves will not tip and cause spillages.
- Potholders from Seaward by Whale also available to ensure pans on top of the stove are also safe and secure.
