

Safety Data Sheet acc. to OSHA HCS

Printing date 03/31/2015

1 Identification

```
· Product identifier
```

· Trade name: Epifanes Nonskid Deckcoating (1-comp.) · Relevant identified uses of the substance or mixture and uses advised against · Product category PC9a Coatings and paints, thinners, paint removers · Process category PROC10 Roller application or brushing · Environmental release category Wide dispersive outdoor use of long-life articles and materials with ERC10b high or intended release (including abrasive processing) ERC2 Formulation of preparations \cdot Application of the substance / the mixture See our technical datasheet for application of this product. · Details of the supplier of the safety data sheet • Manufacturer/Supplier: W.Heeren & Zoon bv. P.O. box 166 1430 AD Aalsmeer Netherlands tel.+31-(0)297-360366 fax +31-(0)297-342078 email: r&d@epifanes.nl · Information department: environment protection department · Emergency telephone number: Emergency Phone Number (24 hours) CHEMTREC (800-424-9300)

Outside US: 703-527-3887

2 Hazard(s) identification

· Classificat	tion of the substance or mixture
GHS	02 Flame
Flam. Liq.	3 H226 Flammable liquid and vapour.
GHS	08 Health hazard
Carc. 2	H351 Suspected of causing cancer.
Repr. 2	H361 Suspected of damaging fertility or the unborn child.
GHS Skin Sens.	07 1 H317 May cause an allergic skin reaction.
· Classificat	cion according to Directive 67/548/EEC or Directive 1999/45/EC
R10-66:	Flammable. Repeated exposure may cause skin dryness or cracking. n concerning particular hazards for human and environment:
	t has to be labelled due to the calculation procedure of the "General
	tion guideline for preparations of the EU" in the latest valid
version. At long or	repeated contact with skin it may cause dermatitis due to the
-	effect of the solvent.
· Classificat	-
	fication was made according to the latest editions of international lists, and expanded upon from company and literature data.

Note P: The substance does not have to be classified as a carcinogen or mutagen as can be shown that the substance contains less than 0.1% (w / w) benzene (EINECS No 200-753-7.). This note applies only to certain complex oil-derived substances in Part 3.

For the wording of the listed risk phrases refer to section 16.

4 First-aid measures

· Description of first aid measures

- \cdot After inhalation: Supply fresh air; consult doctor in case of complaints.
- · After skin contact: Generally the product does not irritate the skin.
- · After eye contact: Rinse opened eye for several minutes under running water.
- · After swallowing: Seek medical treatment.
- · Information for doctor:
- Most important symptoms and effects, both acute and delayed No further relevant information available.

(Contd. of page 3)
 Indication of any immediate medical attention and special treatment needed
 No further relevant information available.

5 Fire-fighting measures

- · Extinguishing media
- Suitable extinguishing agents:
 - CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- · For safety reasons unsuitable extinguishing agents: Water with full jet
- · Special hazards arising from the substance or mixture
- No further relevant information available.
- · Advice for firefighters
- · Protective equipment: Wear fully protective suit.

6 Accidental release measures

Personal precautions, protective equipment and emergency procedures Ensure adequate ventilation Wear protective equipment. Keep unprotected persons away.
Environmental precautions: Do not allow to enter sewers/ surface or ground water.
Methods and material for containment and cleaning up: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Ensure adequate ventilation.
Reference to other sections See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

7 Handling and storage

Handling:
Precautions for safe handling Use only in well ventilated areas. Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols.
Information about protection against explosions and fires: Keep ignition sources away - Do not smoke. Protect against electrostatic charges.
Conditions for safe storage, including any incompatibilities
Storage:
Requirements to be met by storerooms and receptacles: Store only in the original receptacle.
Information about storage in one common storage facility: Not required.

- Further information about storage conditions: Keep receptacle tightly sealed.
- · Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

• Additional information about design of technical systems: No further data; see item 7.

(Contd. of page 4) · Control parameters · Components with limit values that require monitoring at the workplace: 14807-96-6 Talc (Mg3H2(SiO3)4) Inhalative (Tgg)time weighted average 8 hours / Exposure time 0.25 mg/m³ (Algemene bevolking/ General population) 546-93-0 Magnesite Inhalative (Tgg) time weighted average 8 hours / Exposure time 10 mg/m^3 (general population) 546-93-0 Magnesite PEL Long-term value: 15* 5** mg/m³ *total dust **respirable fraction Long-term value: 10* 5** mg/m³ REL *total dust **respirable fraction TLV TLV withdrawn Additional information: The lists that were valid during the creation were used as basis. · Exposure controls · Personal protective equipment: General protective and hygienic measures: Wash hands before breaks and at the end of work. Do not inhale gases / fumes / aerosols. · Breathing equipment: Not necessarily with good ventilation, however, use a filter AX when ventilation is inadequate! · Protection of hands: Protective gloves The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Material of gloves The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. Penetration time of glove material The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed. · For the permanent contact gloves made of the following materials are suitable: nitrile rubber; recommended glove thickness> 0.45mm. permeability / permeation time:> 480 min. according to EN 374.
