

Raymarine®

VoyagePlanner

Home Planning Software

VoyagePlanner

Home Planning Software

Voyage Planner is a powerful, easy-to-use, home-planning and data management software solution for Raymarine multifunction displays.

Voyage Planner allows you to effortlessly manage waypoints, routes and tracks between your vessel's multifunction display and your home planning PC. Bring your PC onboard and import and export waypoints and routes in real time. You can also sync onboard with Wi-Fi or SeaTalk^{hs} (Ethernet). Alternatively, you can use flash memory cards for transferring waypoints and route plans.

Voyage Planner is extremely flexible, allowing you to import and export to Raymarine, GPX, and KMZ waypoint file formats.

Core Features include:

- Simple and fast creation of routes and waypoints
- Instant on-the-fly SeaTalk^{hs} or WiFi sync of waypoints and routes between your Raymarine multifunction display and Voyage Planner
- Connect with the VoyageXChange website to store/share waypoints and purchase charts
- Easy waypoint, route and track transfer via CF or microSD card
- Multiple charts in tab or tile view
- Distance and bearing tool
- Link digital photos to the map
- Depth soundings in feet or meters

Sync Waypoints over Wi-Fi, SeaTalk^{hs} (Ethernet), or with flash memory cards

VoyagePlanner

- 1 Waypoint Database
- 2 Waypoint Information
- 3 Supports multiple chart formats
- 4 Track Database
- 5 Route Database
- 6 User Editable Information

Choice of Cartography

- FREE Ready-to-Navigate cartography cut when you register a multifunction display with Ready-to-Navigate cartography embedded
