

SUPER TOUGH DUAL STRINGER (STDS) TECHNOLOGY

AM's Advanced SUP construction consists of the premium Drop Stitch material, our newest Super Tough Double Stringer technology provides exceptional durability and rigidity.

1. Super reinforced composite drop stitch provides a high tensile, rigid core with thickness unit 100 (4") -150mm (6") and hold pressure to 15psi.
2. Inner reinforced PVC layer
3. Strong double reinforced PVC stringer for increased rigidity
4. 4mm grooving footpad
5. Outer reinforced PVC rail band with 1000 Denier
