

MORE THAN JUST A CHARTPLOTTER

SAILING EDITION

Today's multifunction displays offer far more than just charting and navigational tools. Integrated network instruments and smart software enable you to turn your display into a sailing supercomputer! Whether you're a serious racer, a performance cruiser, or a casual day sailor, brands like B&G and Raymarine provide advanced sailing features to help you sail FAST.

Raymarine

Raymarine Racing Data Dashboard

B&G

B&G SailSteer

Easily access critical sailing data neatly organized on one screen

More Than Just a Chartplotter... SAILING EDITION

Raymarine Live Layline Display

B&G Layline with Windplot

Whether you're racing to the next mark or cruising to the next port of call, dynamic layline calculation helps you maximize Velocity Made Good to get there fast

Raymarine SmartStart

B&G StartLine

Easily ping each end of the start line to ensure you always cross the line first

More Than Just a Chartplotter... SAILING EDITION

Raymarine SmartStart

B&G StartLine

	Upwind TWA (°)	Upwind RS (kn)	Downwind TWA (°)	Downwind RS (kn)
5.0 (kn)	1.0	5.0	195.0	5.0
10.0 (kn)	11.0	6.0	170.0	7.0
15.0 (kn)	18.0	7.0	165.0	7.5
20.0 (kn)	28.0	7.5	170.0	8.0
25.0 (kn)	35.0	7.5	180.0	8.5
30.0 (kn)	45.0	7.5	170.0	11.0

Polar Plot data lists your vessel's maximum performance at various wind speeds and angles. The software in each display can use this to suggest routes and tacks as well as measure your real time performance vs the boat's potential. Take advantage of 260 pre-loaded vessel Polar plots on Raymarine or add your own polar files (usually obtained from the boat designer) on B&G.

Raymarine Apps

B&G Weather Apps

Utilize GRIB files from the internet or subscription services like PredictWind, Theyr and Buoyweather to plan your trip based on wind and weather forecasts.
