Hobart PowerLED

Expertly crafted with elegant detail, this solid brass LED reading light is designed for years of reliable performance. The small round base makes for versatile mounting on bulkheads where space is limited. Also may be mounted to ceiling with head positioned as desired. The head pivots 180 degrees side to side and 90 degrees up and down. Mounts easily and securely with two screws through the base (no complicated brackets or delicate sub-bases to contend with). The warm white color from its PowerLED engine matches the other warm white products in Imtra’s PowerLED range.

An excellent choice for:
- Bunk (pillow) reading
- Behind settee or bench seating
- Over-the-shoulder reading

**Features**
- Solid brass construction
- Large diameter head for ease of handling
- 180° swiveling head (90° up/down)
- Small base for versatility of installation
- Integrated drive electronics

**Benefits**
- Substantial power savings
- High lumen output (equivalent to 10W halogen)
- Maintenance-free; no more bulb changes
- No external driver required
Hobart PowerLED

Advanced LED Solutions

Imtra is at the forefront in the development of LED products for today’s marine market. We are proud to offer a family of first-in-class high flux LED lights that combine proprietary drive electronics with advanced optics and efficient thermal management techniques. Imtra PowerLEDs let builders and boat owners enjoy all the advantages of the latest LED technology, backed by Imtra’s expertise and support.
