THESE  
THREE  
NEW N-ZO RIBS  
ENJOY THE  
BENEFITS OF  
INNOVATIONS  
INCORPORATED  
INTO THE HULL  
AND DECK  
DESIGN.

## design

Armed with the success of the N-ZO 700 Cabin, Zodiac® has once again drawn on the talent of the renowned Italian designer, Vittorio Garroni, to design these boats with **exclusive lines**. These new boats have also been produced in accordance with specific technical specifications to meet the most frequently demanded requirements of recreational sailors.

We have endeavoured to design boats that are both safe and comfortable. They enjoy the benefits of many Zodiac® innovations.

## safety

The safety provided by a semi-rigid boat is well established. The N-ZO range benefits from the experience of Zodiac® in the **design of the hulls** and utilises **two innovative features**:

- **New technology used on the Zodiac® shell**, equipped with a **pronounced V-hull**, which offers unmatched sea keeping and handling.
- The generous height of the free-boards, thanks to the size of its buoyancy tube and the special structure of the hull, turn the **cabin** into a “**cocoon**” for its passengers.

## pleasure

The new N-ZOs are pleasure boats to be shared with others.

Particular attention has been paid to the comfort of passengers, both when sailing and when moored. **Three innovative features have been included in the deck design**:

- Best use has been made of the on board space. The deck lay-out has been designed to facilitate safe moving around on-board. A new console,

safety

# N-ZO 760

called an “Air Console”, more raised, has made it possible to minimise the floor space used and increase your boat’s interior space.

- The areas for entertaining have been enhanced. All N-ZO models have a **spacious aft saloon** which can seat a number of people and which offers direct access to the aft bathing platform.

- The modular design of the boats has not been overlooked. The N-ZO range is equipped with a new bow sunbathing system “Reverse & Sun” which allows an extensive sundeck to be put in place in a matter of seconds by simply unfolding the structure.

The new N-ZO range therefore comprises boats that are **aesthetically pleasing, seaworthy, spacious, and particularly safe.**

Indicated measurements may vary by +/- 3%, or +/- 5% for weight and speed measurements. (1) Maximum permitted load is calculated using ISO standards. Caution is advised when operating fully laden boats. (2) Recommended power is based on optimal use of the boat's abilities under average load. Depending on use, choose either maximum (waterskiing) or minimum power (fishing, cruising). (3) The manufacturer's plaque specifies maximum permitted power. The power of your boat must not exceed this under any circumstances. (4) Maximum permitted weight; dry weight, according to motor manufacturers' catalogue specifications. (5) Maximum speeds are intended as a guide only; they were measured in ideal conditions by professional pilots with one person aboard. They may vary according to make of motor, boat load, propeller type and water conditions. (6) Models in this catalogue are sometimes shown with optional accessories. Please check standard equipment supplied with each model and see your distributor for any additional equipment. The availability of certain models, as well as certain equipment details may vary from country to country (e.g. USA, Canada). The boats photographed in this catalogue may differ from the actual models. Zodiac® continually strives to improve the quality of its products and as such reserves the right to modify or delete any model presented in this catalogue without prior notice. Zodiac® recommends that a life jacket is worn at all times; it is your own responsibility to check the legal obligations on your navigation zone.
