Instructions for the installation of Zodiac’s Oarlocks Upgrade Kit Item# 456289

Items included in new Upgrade Kit include:
(2) new C-Clips
(2) J-shaped buttons
(2) oarlock receivers
(2) oarlocks

If boat has a rope lifeline passing through oarlock support pad, see Step A on page 4.
If boat has no rope passing through oarlock support pad, proceed with Step 1.

Step 1.
Using a screwdriver, with the oarlock receiver in the raised position, remove the C-Clip from the axis.

Step 2.
Using a screwdriver, push the axis out of the oarlock support until the oarlock receiver can be removed.
Step 3.
Remove & discard oarlock receiver. Clean complete oarlock support if needed.

Step 4.
Install the new oarlock retainer onto the receiver as show.

Step 5.
Slide axis back into position.

NOTE: Be sure the new receiver is in the same position as the original receiver and that the oarlock retainer locks around the axis.

Step 6.
Install the New C-Clip onto the axis.

Oarlock Support retrofit is complete.
Step A.
Feed locking tail of rope lifeline back out of center.

Step B.
Pull the tail back through the center of the rope and out of the “D” ring.

Step C.
Pull the lifeline rope through the center (axis) of the oarlock support.

PROCEED WITH Step 1 of the retrofit instructions.

Step D.
Feed the end of the lifeline rope through the axis of the oarlock support.

Step E.
Pass the end through the “D” ring.
Step F.
Pass the end through the center of itself (the lifeline rope) using the original passage if possible.

Step G.
Feed the tip of the end into the center of the lifeline ropes core, while gathering the outer area to make passage easier.

Continue feeding into center until a tight, uniform loop is made.
